Mutate is a strange game. It feels really unpolished. The game isn't terrible, and for the price, it is quite honest, but I can not recommend it, as it does not feel to me like a finished product. I would recommend that the developer switches to early access, and polishes the game over time, increasing the price as it gets more enjoyable. The current idea isn't bad however, and it is playable, but it feels like a free flash game straight from kongregate.

Get it if you are curious, but I consider this title to be sub-par, as it is.. This is a good port of the flash game I remember playing many years ago as a kid. There are added modes, score and stat tracking, and plenty of challenges to give hours of replayability.

If you like Zuma you will enjoy this game and I recommend the purchase.. From the Store Page presentation, and the number and variety of tracks, I expected a semi-serious yet humerous racing game.

It isn't even that. Actually, you'll simply spin and spin and spin and....well, you'll pretty much just spin.

And with zero developer response.

Friends don't let friends buy Calvin Tucker's Farm Animal Racing.. Fun game, with an interesting setting and compelling story. There's a nice selection of skills with an involved and immersive unlock system.
Combat can be approached in many ways: Slow, tactical and thoughtful usage of the right spell at the right time for maximum efficiency, spammy murderfest while your pets (grims) tank, full on petcombat with you as a support character... it's flexible. But my favourite thing has to be the ambience and aesthetic. Music is excellent, visuals are awesome and the general "80's saturday morning cartoon" vibe is fantastic.

Mad props to the devs for making an excellent game again (their previous title was Nihilumbra, and was funded with poker winnings, that is the level of commitment these guys have).

It's also one of the few videogames that feature Catalan as one of the language options, that is commendable.

Solid recommendation for the pricetag it has.. Yeah great VR game... fast and great eye candy.

Had real fun standing up and dancing to the music ;). This game is unfinished and glitchy on startup. Overall it's terrible, not fun to play and a waste of money.. A ton of personality, crisp, clean graphics and simple yet nuanced gameplay. The "Combat" via quips is creative, and I honestly can't think of another game like it! This is a hidden gem.. Game looks good, lot of potential and it´s worth buying. Go ahead and support the Devs ;) Yeah it´s buggy but I want to see more of this great game.. ONE OF THE BEST GODDAMN PINBALLS EVER

I just beat the game. It has so many bugs it's insane.

- Jumping is delayed. It's by design (so you can fall off a ledge and release Space to jump midair) but it's annoying.
- When you get hit your character can multiply. This alone would be confusing but when you have about 10 copies of your character, the game drops down to single digit FPS.
- Some weapons don't swing at all.
- All weapons can be unlocked from the start since you get so much gold and there is nothing else to spend it on.
- After you beat a level, the game will go to a black screen. You can leave it by pressing Esc, choosing Main Menu and going to the game again. However, it will mark the level you were playing as completed. It will also mark the next two levels as completed, meaning that you can skip most of the levels in the game.
- If that black screen bug wasn't enough, it gets worse. In later levels, every level is completely black. Only the shopkeepers, your character and the doors are visible. Walls and enemies are invisible. On top of that, even if you manage to beat a level, the game has to be restarted. If you die in a level, you can try again but it makes the game lag very badly which means you pretty much have to reset.
- One of the achievements is broken.

I found all this in three hours. Do not buy this game. It is not worth it to anyone.. Really enjoyed this game so far. Plays very smooth and has a great atmosphere. Some of the story concepts are a little far fetched but what horror game isn't? If you enjoy walking sim\/horror games in the vain of Slender man, then this is a great addition to your collection. You can check out my lets play video to see the game in action. DevochkaQuest's presentation is fantastic, with childish art and low-key music, and a lot of very cute animation. The puzzles are very simple, and usually just require you to click on everything clickable. The description says the game is short, and that might actually be an understatement. The whole game can be completed in under 10 minutes. Also, despite its minuscule runtime the experience is very buggy and unpolished. There isn't even a title screen, and settings are adjusted via an external utility.

Overall, I still feel DevochkaQuest (or GirlQuest) is a wonderful little gem of a game - a piece of childhood nostalgia and New Year magic.. locomotion in this made me very ill quickly and I can play Vivecraft for hours flying all over the place. Seems like it could be a cool game if it had better controls.. This game has potential, but as of this review it's still fairly buggy and feels incomplete. It's being actively worked on, and IMHO should probably (still?) be marked and marketed as an Early Access title. Avoid for now unless you want to help with the game's development. This will be updated with a more comprehensive review if development slows down or the game reaches a state that feels more finished to me.. TL;DR: Buggy but still playable. Randomly generated plants are fun to look at, especially the trees. Graphics are beautiful. Audio's kinda bad -- repetitive soundtrack, very few sound effects, but it doesn't take away from the enjoyment. Overall it's a pleasant experience that you can only get here.

Getting more in-depth, there're a couple things to know if you want to enjoy this game.

First, there's a trash-bin to your left. Use that to get rid of the pot currently on your desk, or throw away seeds that you don't particularly like. Note that doing that second thing makes the seed count glitch out, and you'll end up opening a brand new seed packet to find anywhere from one to four seeds inside. It's still kinda worth it, because otherwise your seed drawer fills up with junk.

Second, you can't edit or delete entries in your seed journal (from what I can tell), so only record ones you actually care about, and make sure it's accurate before you send it in. Also, you might encounter a glitch where you enter the seed journal to find an entry already open, right-click out of it, and discover your cursor is stuck in the middle of the screen. Just back out, go back in, close the entry, and this time it'll work. Having to do that every time does get old, though...

Third, you can rotate the circular thingy on your desk if you want to get a better look at your current plant, and you can put multiple plants in certain pots. Using planters to try out your five newest seeds at once is recommended.

Lastly, there's a bug where, if you try to grab a new pot when one is already on your desk, you'll get stuck halfway between the pot shelf and your desk, and you'll have to exit to the menu and start the day over. That one kinda sucks, so watch out.

The rest of the issues are kinda minor. A few typos, a noticeable lack of sound effects, disappointing randomly generated plants, an overabundance of sameface succulents, the depressing sense that the main character has no friends and never ventures

outside... but it's really more good than bad. You get to settle into a comfortable routine of discovering new plants, filing them away in your notebook, fulfilling requests, and acquiring new pots. You get to experience the frustration of just starting out, the pang of rejection, and the satisfaction of a job well done. Eventually, you're putting together genuinely beautiful arrangements using your best finds and your shiniest pots, and that feels pretty good. And the trees actually look amazing; they're my favorite part of the game.

So if that sounds like a good time to you, and you don't mind the price, I very much recommend this game.. THATS MY GAME :). Awesome. Finished single player campaign. Great story, great voice acting and great visual/audio presentation, especially for the time. Well worth every penny.
