Not worth the money. Poorly made.. This is a decent Sudoku game. You've got to be careful on adventure mode, as your tenth incorrect guess means you lose and have to restart. If you try to solve the puzzles quickly, this means if you press a few wrong keys (say there's a cold day and your fingers lock up a bit), that's it.

There's a number of things to help you, if you need the help. Those powerups could have been improved a lot, especially if mousing over them told you what they actually did!

I notice some comments about stability, but the game has been very stable for me so I believe any issues were resolved.

Overall I recommend this game.. \u0415\u043d\u043e\u0442\u043e\u043c\u0430\u043d\u0438\u0444. Nice game for Sudoku enthusiasts, but there is no much more besides it, still all around the core sudoku works beautifully; interface, gameplay and the different modes are very interesting, some i havent played before and found pretty well done. Again is not for everyone, but if you like Sudoku is definitely a very decent game. Divided on this game really, I'm a fan of sudoku, so played quite abit of sudoku games. Puzzles here are abit on easy side (got to level 8 sofar, they probably get harder.) Lost most of my lives to controls, which is were the main annoyances lie. They don't explain much in controls, right click can move you about to see on the multi-board, gotta be careful on note taking vs entering to not accidently put in wrong number, and sofar I hit two boards that have multple answers but game takes a life if you don't enter the one it wants. And sofar havn't seen a way to recover life so that looks to be a major annoyance since losing all lives puts you back at level 1.

Getting use to controls, if it wern't for the multiple anwser but you lose a life if you guess wrong I'd probably drift into the recomend area but with annoyances for lovers of sudoku .. Won't work off-line have to be on steam or else game crashes graphics for numbers atrocious supposed to be hand drawn pencil very difficult to see. Sudoku. Enough said.. Holy xxxx I solved over 300 sudoku puzzles within half a day??? Praise the sun!!!

Srsly this game can be more than this. 7/10. It's sudoku. Not much more to say other than that to be honest.

Biggest issue is how you select a number. Instead of clicking on a box and a wheel coming up to let you pick which number to choose you have to push the number at the bottom then move to the squares you wish to place the number in. Doesn't sound to bad to some people, but when you are in adventure mode and you only get ten mistakes, it really messes you up when you are going fast.

Also, I'd probably wait for this to go on sale. \$3- \$4 maybe.. I paid for this?

bringing soduko back. It would be a great sudoku game, but due to some crashes, I cannot reccommend it.

I was playing on my PC, and suddenly it started to crash on the launch. I moved to my laptop, and it was everything fine until recently, when the game stopped on the loading screen forever.

Also, the game never worked offline. It would be perfect to play while traveling, since this is a casual game, but you need a connection or the game crashes.

I tried to contact the support, but the page indicated on the steam doesn't exist. It seems the devs stopped supporting the game.

I liked very much the interface, and the theme, but with those unsolved problems I cannot reccomend this game.
